Application No. 10/501,343

Continuation of 11. does NOT place the application in condition for allowance because: Applicants' arguments traversing the rejections of record are not persuasive. Gonzalez-Blanco et al. is not drawn to an ink-jet ink, as argued by Applicants, but is rather drawn to a pigment preparation used in said ink (col. 10, lines 24-25, see also col. 8, lines 8-22). The components disclosed in Gonzalez-Blanco et al. read upon Applicants' components (A); (B), and (C), as set forth in the Final Rejection. The reference's contemplation of more than one of either nonionic or anionic dispersants does not exclude the contemplation of one (or more) of each dispersant, i.e., one nonionic dispersant, and one anionic dispersant. The combination of the references, as set forth in the Final Rejection, are not based on the individually and respectively disclosed intended uses of the pigment preparations, but on what each pigment preparation contains, and the common components therebetween.

The proposed amendments overcome the 112(2) rejections maintained in the Final Rejection. However, the provisional obviousness-type double patenting rejection is maintained, pending the status of both this application and that of the copending application (10/515,345) For these reasons, Applicants' arguments are not persuasive, and the Final Rejection is maintained.
